

Precision's Oncology Site Network: Find precisely the right sites for your complex oncology trial

Precision's Oncology Site Network (OSN) puts enrollment-ready sites at your fingertips

We assemble our network carefully, choosing sites with flawless records of skillfully managing complex trials. We then implement an optimized activation process, focusing on swift and dependable start-up—where possible, within 90 days.

- Well-vetted, prequalified oncology sites accelerate site selection
- Academic and community-based sites throughout the United States, Canada, Europe, and Asia

- Track record of swift, dependable start-up—including feasibility, study design input, and patient accrual
- Nursing and resource models to support patient-centric treatment
- Highly skilled in conducting phase 1 trials with challenging PK sampling and biopsy requirements for correlative/translational requirements
- Expertise in phases 2, 3, and 4

OSN sites rely on our expertise—and benefit from our support

Part of Precision's end-to-end oncology development solution, the OSN benefits both sites and sponsors.

- Start-up and enrollment support from a leader in early-phase oncology development
- Engaged, ongoing support from highly skilled oncology clinical trial monitors
- Access to novel agents for patients in need
- Increased opportunity to partner with sponsors

**Precision's Oncology Site Network is a global network of
Centers of Excellence with turnkey start-up.**

A personalized approach to matching the right sites to the right clinical trials

At the heart of oncology clinical research are the patients who need novel innovations in cancer treatment. Clinical trials can provide them with life-saving therapeutics, even as a drug continues development. Precision is passionate about supporting these endeavors—and deeply committed to matching the right sites and the right patients to the right oncology trials.

- Sites are hand-selected and carefully vetted through the lens of our expertise and experience
- Contracts, processes, and other prequalification operations are completed to expedite study start-up
- Our consultative, engaging relationship with network sites results in a deep understanding of site needs and opportunities, correlating to seamless clinical trial execution

Accelerating the worldwide pathway for oncology drug development

Global lab footprint

Flawless biomarker assay execution and informatics drug continues develop

Global trial execution

In-country expertise with multinational scale

Global Oncology Site Network

Rapid enrollment with respected sites

Precision's Oncology Site Network is led by Tandy Tipps, MED, MPA, PhD, former Department Administrator for Investigational Cancer Therapeutics at The University of Texas MD Anderson Cancer Center.
